Abstract (en)
[origin: GB2366286A] A carded blister pack has a mounting card (12) with a hinged spine element (15) and an adhesive edge strip (16) attached to an edge region of a preformed blister pack (11) so that the card (12) may be folded to form a cover. The card may include a further portion at the opposite side of the adhesive strip, which portion may be removable along a line of weakening, respective blister packs may be attached adjacent a series of spines or multiple blister packs may be attached along a single spine and the blister packs may be of triangular or curved shape. A machine for assembling carded blister packs may include mounting card and blister pack storage magazines, means for conveying cards through an adhesive application station into juxtaposition with the blister packs and a press station.
