Abstract (en)

An anti-frost frame for a refrigerated machine comprises a rectangular frame (1) of an L-shaped cross section, bearing on its internal side a heating device (5, 10) formed by an electric resistance (5) enclosed within a duct (10) fastened by a number of parallel lugs (6) and on the external edges a rim (2) allowing the mounting of the frame to the machine body. The frame also comprises a transverse hollow cross bar (3) also accommodating a heating device (5, 10) and fastened by end lugs (12) to cavities (7) in the frame jambs. <IMAGE>
