Abstract (en)

[origin: EP1335334A2] The method involves displaying (2) moving win symbols and a control unit accepting operation of a control element (3) for a defined time window and detectably displaying at least one win symbol after operation of the control element within the defined window. Several control elements and/or contact fields are simultaneously released for operation of the control unit. AN Independent claim is also included for the following: an arrangement for implementing the inventive method.
