Abstract (en)
[origin: WO0241868A2] A paper product that is applied with a lotion composition is provided. In one embodiment of the present invention, the lotion composition includes an oil component that may contain oils and oil-soluble skin conditioning agents, a solid component that may contain fatty alcohols and waxes, a water-soluble skin conditioning component, and an emulsifier. Typically, the add-on level of the lotion composition is between about 1% to about 10% by weight of the paper product. As a result, the paper product can be used to dry the hands of a user, while also imparting certain benefits to the skin as well.
