Abstract (en)

[origin: WO0240048A2] The invention relates to the use of special antibodies optimised by phage-display of optimised antibodies against GPIIb/IIIa for combined inhibition of fibrinogen to platelets and the vitronectin binding to endothelial cells for therapy and/or prophylaxis of vascular clusion. The invention also relates to the use of said antibodies for inhibiting angiogenesis or/and for inhibiting the metastasis of tumours or/and for inhibiting intimal hyperplasia following vascular damage.
