Abstract (en)  
[origin: WO02098744A2] Substantially triangular shaped container bottoms include a bottom wall with a concave surface. The container bottom can be used with a container body having an interior chamber for receiving at least one article. Exemplary embodiments include a container bottom attached to a container body wherein the container bottom includes a central surface area that is inwardly concave towards an interior chamber of the container body. Methods of loading a plurality of articles in a container are also provided.  
[origin: WO02098744A2] Substantially triangular shaped container bottoms (38) include a bottom wall (42) with a concave surface. The container bottom can be used with a container body (34) having an interior chamber for receiving at least one article. Exemplary embodiments include a container bottom (38) attached to a container body (34) wherein the container bottom includes a central surface area (47) that is inwardly concave towards an interior chamber of the container body. Methods of loading a plurality of articles in a container are also provided.
