Abstract (en)

[origin: WO0240518A1] The invention concerns pharmaceutical composition comprising in a pharmaceutically acceptable medium at least a peptide derived from a periplasmic domain of an enterobacterium Omp protein or a nucleic construct coding for said peptide, as well as the use of such a peptide or of such a construct for preparing a vaccine for prophylactic or therapeutic treatment of viral, bacterial, parasitic or fungal infections or for preparing a vaccine designed for prophylactic or therapeutic treatment of cancers.
