Abstract (en)
[origin: EP1336363A2] The clothes hanger (10) is fitted with guides (20,22) attached along both sides of its arms (14) and provided with a row of projections (26) for being engaged with a recess (36) located at the inner surface of a clip (28) used for the temporary joining of a garment to the clothes hanger (10). The clip (28) can be moved along the guide (20,22) unrestrictedly as long as there is no garment attached to the hanger (10) but is prevented from moving unintentionally from the predetermined position. A lever (42) facilitates an easy positioning of the clip (28).
