Abstract (en)

The device for silkscreen printing decoration by transfer comprises: a silkscreen printing screen (1); supporting means (3) to position an item to be decorated (P) in front of said silkscreen printing screen; means (7) to apply a silkscreen printing ink (I) to said silkscreen printing screen. To transfer the ink from the silkscreen printing screen to the tile or other item to be decorated a nozzle (5; 5X) is provided, positioned in front of said silkscreen printing screen on the opposite side from the item to be decorated. The nozzle produces an air jet which causes transfer of the silkscreen printing ink from the silkscreen printing screen to the item. <IMAGE>
