Abstract (en)
[origin: EP1336560A1] Marine lifesaving equipment includes a container (10) having a rescue means (14) in the form of a net upon which a person to be saved from a body of water may rest, and a buoyancy means (16) in the form of a number of floats. The container (10) has at least one entry point (50) for the person to be saved. The buoyancy means (16) and the entry point (50) are arranged such that the entry point (50) is provided at or preferably below a surface of the water. A method of rescuing a person from a body of water is also described. <IMAGE>
