Abstract (en)  
The present invention relates to a road surface (1) for a road, comprising a plurality of adjacent foundation elements (3) lying on opposite sides of and in longitudinal direction of the road for supporting a plurality of adjacent prefabricated beam-shaped elements (4) forming the road surface on which traffic moves, whereby each prefabricated element (4) comprises a first (7) and second (8) edge being supported by rows of foundation elements (3) lying opposite to each other, such that an open space (5) is formed below the road surface (1), whereby each prefabricated element (1) is made of reinforced concrete. <IMAGE>
