Abstract (en)

[origin: EP1336697A1] The present invention concerns an angle joint system connecting a cam or bottom strut (3) to two upper edge struts (4) connected at an angle, and having a corner piece (1) that is fixed to the upper edge struts (4) and a fastening piece (2) which fixes the cam or bottom strut (3) to the corner piece (1), characterised in that the corner piece (1) has a base part (6) as well as flanges (8) which are hinge-mounted to this base part (6) on both side edges which, on the inner side of the angle, stand at right angles to both the upper edge struts (4) and are fixed to these upper edge struts (4). <IMAGE>
