Abstract (en)

[origin: EP0965712A2] The link point (41) is located on a second drive bar (21) running counter to the first. Buttresses are formed by movement end stops (42',42",44',44") of the drive bars (20,21). The drive bars are fitted to the rear of a closure strip (5), which has a recess (49) for inwardly pivoted location of the operating lever (19). The tab-type link (45) has a free section (50) aligned with the edge of an engagement space. A closure strip fixture screw is provided, on which the narrowed zone (Z2) of the drive bar (21) slidingly supports.
