Abstract (en)

[origin: EP1030115A1] The heating element (10) has two ends (11) extending outside the cooking enclosure through an opening (8) formed in one of the side walls (4) of the cooker, with each having a local flattened region (20) that co-operates with an attachment at the end of a spring (16) that holds the element in its working position. A detachable electrical connector (12) is provided at the end of the element.
