Abstract (en)

[origin: EP1336937A1] A mobile communication terminal (2) transmits access rights data comprising an access control device identification to access control devices (1,1'). An access control module (13) checks the data received from the mobile communication terminal, with the predetermined access rights data, based on which user's access right is approved. Independent claims are also included for the following: (1) access control method; (2) computer program product for performing access control; and (3) access control device.
