Abstract (en)  
[origin: EP1337008A2] The connector (1) has a quick-action interlock with two parts (2,3) connected to one another by a coupling unit (26). The two connectors are connected together to form inner (10) and outer (9) conductors, with an outer conductor part of the latter connector and a resilient contact between the two parts. A contact unit (16) with an annular disc (23) contacts two outer conductor parts (11,12) along a closed circular line.
