Abstract (en)

[origin: EP1337118A2] The method involves sending text messages from a first terminal via a network to a message server, which passes the messages in a selected data format to at least one second terminal/receiver, from which they are output acoustically and/or visually. The first terminal is a public pay telephone that deducts an amount from a credit notified by its payment unit for services provided and the text message is entered via its input arrangement. The method involves sending text messages from a first telecommunications terminal (10) via a telecommunications network (12,16) to a message server (22), which passes the text messages in a selected data format to at least one second telecommunications terminal/receiver (18,20,32,34,36), from which it is output acoustically and/or visually. The first telecommunications terminal is a public pay telephone that deducts an amount from a credit notified by its payment unit for telecommunications services provided and the text message is entered via an input arrangement of the public telephone. AN Independent claim is also included for the following: an arrangement for implementing the inventive method.
