Abstract (en)  
[origin: WO0219854A1] The invention concerns a foldable solar protection device comprising several articulated elements, characterised in that the articulated elements are stacked panels (1) linked by a single pivot (4) proximate to one (6) of their ends to be unfolded in a circular movement and in that it has means maintaining the panels (1) in unfolded position. The invention is particularly applicable in the field of clothing accessories for advertising.
