Abstract (en)
[origin: WO0241847A1] The invention relates to a cosmetic or dermatological agent in the form of a creamy permanent mousse or a stable foamed cream, which is provided as a ready-prepared mousse product in appropriate packaging and can be removed from said packaging. A foaming degree of at least 10 % and a maximum density of the total mass of 0.9 g/ml are preferred. The incorporated gas or the bubble structure that has been produced remains stable in the mass even when stored for at least a week at room temperature (20 DEG C). The agent can be produced by the provision of a liquid composition that can be foamed, which has a flow point at room temperature (20 DEG C) and by the subsequent expansion or foaming of the composition using a gas.
