Abstract (en)

[origin: WO0220363A1] A reclosable bag (20) has a body with opposite faces (30, 44) having side edges (40, 42) and defining an interior (48). The bag also has a reclosable hook-and-loop fastener strip (12) secured to one of the bag faces. The fastener strip may form a reclosable face closure for accessing the bag interior through a face of the bag. In some cases the closure strip (12) extends around one or more of the edges (40, 42) of the bag to form a pour spout side opening (26) or to define a hinge as in a flip top box.
