Abstract (en)
[origin: US2004041139A1] The invention concerns a protective barrier comprising a net installed across a slope. The invention is characterized in that the net is maintained by several supports comprising each a first mast globally pointing downstream and whereof one end is fixed to an anchoring point in the ground and a second upright mast resting on the ground, the two masts intersecting side by side in a specifically selected geometrical configuration, in particular with guy cables installed between the masts.
