Abstract (en)

[origin: WO0244615A2] The invention relates to a light arrangement, comprising at least one light (1) which has a trough-shaped base body (3) and connection elements for a light source (5), said connection elements being located on said base body. At least two edge rails (33a) which face each other and which each have a groove (36) that is oriented against the base body (3) of the light (1); and connection elements which penetrate the base body (3) or parts thereof and which engage in the groove (36) are provided in order to improve the application possibilities and/or the stability of the light arrangement or light.
