Abstract (en)
[origin: WO0242686A1] The invention relates to a burner with a burner head (1) and a gas introduction tube (2), arranged within the burner head (1), surrounded by an annular channel (3), for the introduction of a further gas. Means (10, 11) for producing swirling in the gases flowing through the gas introduction tube (2) and the annular channel (3) are arranged in the gas introduction tube (2) and the annular channel (3).
