Abstract (en)

[origin: WO0241570A2] The invention relates to a method for transmitting information, especially to operators of household appliances. The invention also relates to a corresponding device and an information system. The aim of the invention is to provide a method, a corresponding device and an information system offering an alternative means of transmitting information to potential customers. To this end, a household appliance (2) is connected to a distributed network (3) and receives, via said network, information, messages or advertisements which are then displayed at the location of the household appliance (2).
