Abstract (en)
[origin: EP1338227A2] The finding relates to both a clothes hanger and to trousers hanging bars, exhibiting so-called "non-slip" surface portions that prevent the slipping of the hung item and the slipping of the folded item. Said elements are characterised in that said non-slip surfaces are realised by laying a film (3, 4) of a silicone-based material (Fig. 3). <IMAGE>
