Abstract (en)

[origin: EP1338228A1] The fixing means has a base element (2) with fixing face (4) and bearing face (5). A profiled element (6) resting on the bearing face is fixed on the base element by the clamping element (3). The fixing face has a socket for the clamping element which extends transversely to the bearing face along the fixing face. The fixing face can be formed as a box like profile of rectangular cross-section with a slot to form the socket.
