Abstract (en)

[origin: EP1338522A1] The box is made up from a single sheet of cardboard (1) cut out to make four main side panels (2, 3, 4, 5), end panels (9, 13) with flaps (17, 18, 19) and tongues (11), and additional panels (28, 36) that fold inside the box to form a V-shaped wedging support for its contents, e.g. a tube of a cosmetic substance. The additional panels are joined to one of the main side panels (5) by a flap (26) and a fold line and connected to one another by a second fold line (34), with another flap (37) on the second additional panel for positioning it inside the box.
