Abstract (en)

[origin: EP1338551A1] Device for filling bottles (B) and other containers with food and drink comprises at least one arrangement (15, 16) with secondary centering elements, each receiving and centering a partial plate (P1, P2) which is distanced from a corresponding complementary partial plate (P2, P1) to widen container-holding devices. Preferred Features: Two arrangements with secondary centering elements are provided. Each arrangement receives a complementary partial plate which are distanced from each other to widen container-holding devices.
