Abstract (en)

A saturator, particularly for dissolving carbon dioxide in water, comprising a casing (2) adapted to contain a coil (12) at least partially immersed in an ice bank generated by a thermoelectric refrigeration unit. The saturator comprises a Peltier cell (11), which constitutes the thermoelectric refrigeration unit and is associated with a diffuser (10) that is arranged inside the casing (2) and is connected to a heat sink (14) arranged outside the casing. <IMAGE>
