Abstract (en)

[origin: EP1338747A2] The sealing has at least one frame corner section (1) with an adjacent sealing bar (2) containing hollow chambers along its longitudinal profile. The corner section and the sealing bar are firmly bonded together, and have the same cross section shape. The end faces (3) of the corner section have projecting locking units (4) to be inserted into the hollow chamber of the sealing bar in a positive fit. The end faces of the corner section are also fitted with a groove (5), to be filled with an adhesive.
