Abstract (en)

[origin: EP1338849A1] The method involves carrying out the cooking process using an adjustable cooking program and setting the cooking parameters using an input device. A point in a performance characteristic of at least two dimensions is controlled by the operator using the input device. At least two parameters are defined and the point set is implemented as part of the cooking process in the cooking program. AN Independent claim is also included for the following: a control panel for a cooker and an arrangement for treatment and preparation of food.
