Abstract (en)  
[origin: WO0239866A1] A vacuum cleaner comprising a vacuum cleaner housing (10) with a vacuum source and an inlet (13) for dust-laden air communicating with the vacuum source. The vacuum cleaner has a separation system for particles separated from the airflow that is placed after the inlet as seen in the airflow direction. The separated particles are collected in a bag (21) of a mainly airtight material. The vacuum cleaner is provided with a closing and/or sealing arrangement by which a bag (21) inserted into the vacuum cleaner is closed and/or sealed before the bag is removed from the vacuum cleaner.
