Abstract (en)

[origin: WO0242636A1] The invention relates to a pressure-controlled fuel injection device (1), comprising a common rail (2, 18), an injection nozzle (5) and a metering valve (6) for controlling said injection nozzle (5). According to the invention, the metering valve (6) is incorporated into the common rail (2, 18), in order to reduce the manufacturing costs of the fuel injection device (1).
