Abstract (en)
[origin: WO0244619A1] Wall-mounted cookers comprising a housing (38) with a hood and an oven (32) are known. The base of the hood has an opening, which can be closed by a base door (2) that can be lowered. A retaining part (19) of a device that retains a cooking product carrier is mounted on the upper side of the base door (2) facing the oven (32). According to the invention, to facilitate the cleaning of the retaining part (19), the latter (19) is detachably connected to the base door (2).
