Abstract (en)

[origin: WO0248632A1] The invention relates to a handgun with a first (9) and a second (5), independent of the first, individual identification, carrying information, arranged in a hidden, at least not immediately discoverable or recognisable location and/or which is not recognisable as an identification. The invention further relates to a method for the production of said handgun whereby pre-programmed transponders (5) are prepared, a recess with dimensions corresponding to the transponder is produced in the grip piece (1), provided with a first identification (9), or in the housing of a handgun, a transponder (5) is introduced or injected in the drilling and then the identification of the transponder is read by means of a reading device and matched to the first identification (9).
