Abstract (en)

[origin: WO0241278A1] The invention relates to a monitoring system (OVE, 100) comprising means (102) for reception of one or more monitoring input signals, means (102, 120, 106) for handling of one or more of the above-mentioned monitoring input signals, means (130, 132) for wireless transmission of communication, and means (120) comprising means for identification of one or more recipients of wireless communication and means for control of the transmission of wireless communication to said recipients. According to the invention, a highly adaptable monitoring unit has been obtained.
