Abstract (en)
[origin: EP1340449A1] The foot scraper has several parallel running profile supports (1) rigidly or flexibly connected to each other by connecting members. The profile supports comprise at least two parallel running side parts (4.1,4.2), which are connected by at least one through cross rib, which by means of the side parts form one or more open or closed chambers (7.3). The side parts extend over the upper and/or lower face surface upwards and/or downwards, forming an upwardly and/or downwardly open chamber (6.1). The upper chamber accommodates at least one scraper component. The lower chamber (3) accommodates at least one lower support component and a noise-absorbing component.
