Abstract (en)

[origin: EP1340591A1] The device has a suction device and a dust collection device (2) with a filter arrangement. The dust collection device has a housing part (8) with a guide arrangement for the filter arrangement and an opening with a cover for removing the filter arrangement and for emptying dust collected within the housing part. The cover can be opened and closed for filter removal with the housing part mounted on the tool housing (6).
