Abstract (en)

[origin: EP1340694A2] The cup plate (1) consists of a backing material which on at least one side has a surface-rough overprint (3) which in at least one area is recessed. The recessed area has the form of geometric figures and/or letters and/or letter combinations and/or phantasy-associated representations. The recessed area (4) in the surface-rough overprint lies on the additionally sealable surface side facing the packed product and comprises the connecting region between the cup plate and container.
