Abstract (en)

[origin: EP1340705A2] The manipulating device includes a separation mechanism which is adapted to be moved into a stack repository (1) while a sheet stack (3) is conveyed away from the stack repository. The separation mechanism includes a belt (17). An Independent claim is also included for a method for separating stacks of sheets in a device for forming sheet stacks in a stack repository and for conveying the sheet stacks away from the stack repository.
