Abstract (en)
[origin: EP1340863A1] The segmented roof has a number of parallel slats (3) mounted to pivot around a pivot point (4) parallel to its longitudinal extent. A cover unit (8) is installed in the region of the transverse sides of each slat and comprises at least two and possibly three movable plates (10-12). The cover unit has a baseplate (9) upon which the plate sections are pivotably mounted. The plate sections are located one behind the other in the longitudinal direction of the slats and are offset in relation to each other.
