Abstract (en)

[origin: EP1341269A1] The device makes crimp connections with a driven crimping tool that joins a conductor (41) end to a crimp contact. A workbench (33) is provided with more than one tool station (34) with at least one crimping tool and a supply of crimp contacts, whereby each tool station can be individually moved to the crimping press (35) with a non-linear motion and individually operated using the crimping press.
