Abstract (en)

[origin: EP1341396A2] The cover (1) has a hood-shaped main section made of an elastic material, provided with an opening for covering an operating element of the hearing aid switch (5), fitted with a flange section (8) projecting radially outwards, parallel to the plane of the opening and pressed into sealing engagement with a housing section (4) of the hearing aid. The cover can be located via pins (6) projecting parallel to the operating direction of the switch. Also included are Independent claims for the following: (a) a hearing aid frame; (b) a hearing aid
