Abstract (en)

[origin: WO0248115A2] This invention provides methods for controlling invertebrate pests comprising contacting the pests or their environment with an arthropodically effective amount of a compound of Formula (I), its N-oxides or agriculturally suitable salts wherein B, J, K, R<3> and R<4> and n are as defined in the disclosure. This invention also pertains to certain compounds of Formula (I) and compositions for controlling invertebrate pests comprising a biologically effective amount of a compound of Formula I and at least one additional component selected from the group consisting of surfactants, solid diluents and liquid diluents.
