Abstract (en)
[origin: WO0246351A1] The invention relates to a hydrous, thixotropic detergent in paste form, containing the following in relation to the overall product: a) 5 to 40 wt. %, preferably 8 to 30 wt. % of an alkalinity support, chosen from alkali hydroxide and/or alkali carbonate; b) at least 5 wt. %, preferably 15 to 40 wt. % water; and c) more than 3 wt. %, preferably 5.5 to 30 wt. %, especially 6 to 15 wt. % non-ionic tensides. The product has a viscosity of 50 000 mPas to 250 000 mPas at 25 DEG C, measured with a Brookfield rotation viscometer (spindle no. 7) at 5 rotations per minute and a viscosity of 12 000 mPas to 80 000 mPas at 50 rotations per minute under otherwise identical conditions.
