Abstract (en)
[origin: US6817282B2] A cooking device includes a cooking chamber having at least one vapor opening through which the vapor from the cooking chamber, when in operation, conveyed by a conveyor, and at least one opening that can absorb external air, particularly with the aid of the conveyor. The invention also relates to a device that can be used to adjust the amount of external air and a vapor stream from the cooking chamber according to the external air.
