Abstract (en)
[origin: WO0248650A1] A system and a procedure for a telephone service to provide a user (1) with route description to, and information about, a geographical object, for instance a company, a type of company, an address or the like. The procedure includes the steps that the user (1) establishes a connection via a communication system (20, 50), preferably a mobile telephone system (20), with a speech service device (40) including a speech service server. The user (1) states/gives a spoken command to the speech service device (40), which command includes an inquiry regarding type of geographical object. The speech service device (40) a that derives, from one to the communication system (20) connected database (70), position related information associated with said object, and presents, by synthesized speech, said position related information to the user (1).
