Abstract (en)
[origin: WO0244818A1] The invention concerns a watch case comprising: a middle (10), a rotary bezel (14-2) outside said middle, said rotary bezel comprising at least a magnetic portion (2), a member inside said middle, designed to be controlled by the magnetic field of said magnetic portion, said member (11) including a ring concentric (4) to said rotary bezel and provided with at least a magnetic portion, so as to be driven in rotation by the magnetic field of said rotary bezel during its rotation, and wherein said member is of the analog type and can take up an infinite number of different positions depending on the angular position of the rotary bezel.
