Abstract (en)
[origin: EP1213897A1] The method involves configuring the control interface or voice input device over the network (GSM) by transferring at least part of a voice knowledge base, especially at least parts of a vocabulary from several stored ones, from a central station (SMC) in the network to a terminal component for storage in an internal knowledge database, especially a vocabulary memory (WM). Independent claims are also included for the following: an electronic device ands a system for implementing the method.
