Abstract (en)

[origin: EP1342428A1] The comb/brush/applicator (1) has groups (15, 15') of at least three projecting elements (12a, 12b) spaced at even intervals along a support (11) with gaps (16) between the separate groups. The length of the projecting element can vary between 0.5 and 10 mm and is preferably 1 to 3 mm. The support can be solid or in the form of two twisted wires, and the projecting elements can be in a wide variety of shapes and configurations, made e.g. from moulded plastic or bristles with anti-friction, magnetic or biocidal agents.
